

Boeing livre le premier AWACS modernisé à l'armée de l'Air française

2014 - 07 - 23 - www.latribune.fr

Le premier AWACS français modernisé est de retour dans l'armée de l'air française. "Conformément au calendrier établi, Boeing a livré le 17 juillet le premier des quatre avions AWACS français modernisés, a annoncé mardi soir Boeing.

Cet appareil va permettre une nette augmentation des capacités de la flotte militaire française en matière de surveillance, de communications et de gestion des combats". L'appareil a été livré à l'issue d'une campagne d'essais au sol et en vol menée sur la base aérienne d'Avord (Cher), et de sa qualification prononcée par la direction générale de l'armement (DGA). Boeing avait livré cet

appareil à la DGA en février. Le programme de modernisation à mi-vie des AWACS, ou système de détection et de commandement aéroporté, permettra aux équipages de disposer d'informations davantage exploitables et d'une vision plus complète de l'espace survolé, tout en améliorant l'efficacité des missions exécutées et l'efficience des avions.

"Le programme de modernisation à mi-vie des AWACS français est un modèle de perfectionnement des capacités de renseignement et de surveillance au sein des forces armées. Ce programme souligne par ailleurs l'engagement constant de Boeing...

BAE fights for more F-16 upgrade competitions

2014 - 07 - 15 - www.flightglobal.com

BAE Systems is looking to Greece, Turkey and Chile as the next likely targets for its assault into the market for upgrades of legacy Lockheed Martin F-16 fighters. John Bean, vice-president and general manager global fighter programmes, says BAE has already held discussions with those nations, encouraging them to look at other options apart from Lockheed for upgrades.

“Right now we’re making sure they know there is a choice,” he says. Another three to four nations have also engaged in preliminary talks, says Bean, although declines to identify them. BAE to break into the upgrade market in 2012 when it won a contract to upgrade South Korea’s KF-16s with new avionics, mission systems and Raytheon’s RACR radar.

The first two aircraft, which are being used for design and development work, were recently inducted to its Alliance airport facility in Fort Worth. They are expected to be re-delivered...

Sabena Technics remporte le marché de MCO des avions Falcon 50 de la Marine Nationale

2014 - 07 - 12 -

lignesdedefense.blogs.ouest-france.fr

C'est l'entreprise Sabena Technics (installée sur l'aéroport de Dinard-Pleurtuit) qui va assurer le maintien en condition opérationnelle des avions Falcon 50 de la Marine Nationale. Huit appareils sont concernés.

La valeur de ce contrat est de 108 429 322 euros (Hors TVA). Les Falcon 50 Mi (Intervention) et Ms (Surveillance) de la Marine Nationale sont des avions triréacteurs supérieurs à 5,7 tonnes, selon les termes de la réglementation civile. Ces avions, issus de la version civile du Falcon 50, ont reçu des modifications spécifiquement militaires, à savoir notamment le radar Ocean Master 100, la trappe de largage (sur Falcon 50 Mi uniquement) ou les hublots d'observation pour les équipages.

Leurs missions principales sont la surveillance maritime, la recherche du renseignement, la recherche et le sauvetage en mer. La consultation portait sur le soutien global (cellule, rechanges...
