

## Airbus Helicopters, Vector Aerospace and Rockwell Collins sign Pro Line Fusion® cockpit upgrade agreement

2015 - 06 - 16 - [www.airbusgroup.com](http://www.airbusgroup.com)

Airbus Helicopters, Vector Aerospace and Rockwell Collins have entered into an agreement to jointly develop and market the scalable and flexible Pro Line Fusion integrated avionics solution to upgrade Airbus Helicopters platforms.

“Pro Line Fusion provides Airbus Helicopters with one of the most advanced avionics and the highest level of efficiency for the rotary wing cockpit,” said Troy Brunk, vice president and general manager of Airborne Solutions for Rockwell Collins. “The enhanced situational awareness features provided by Pro Line Fusion will result in reduced pilot workload and greatly increase flight

safety for operators of Airbus Helicopters platforms.” The first platforms targeted for the upgrades will be AS332 / 532 MK1 helicopters, with the first implementation expected in the summer of 2016.

“In our constant search for customer satisfaction, we have identified the need to offer modern but affordable glass cockpit retrofit solutions to our customers to allow them to extend the operational life of their helicopters.

Entering in this cooperative agreement with Vector Aerospace and Rockwell Collins to develop a state-of-the-art upgrade solution for the existing fleet of...

## French MoD renews TBM 700 fleet support contract with Daher

2015 - 06 - 16 -

[www.flightglobal.com](http://www.flightglobal.com)

The French Ministry of Defence has renewed a multi-year contract with Daher for the continued operational support of its TBM 700 fleet. The deal was awarded by the French military procurement agency's SIMMAD maintenance organisation following an 18-month tender process.

It covers the airframe, engine and propeller on all 27 of the military's high-speed, single-engined turboprops. The aircraft are used by the French armed forces for VIP transportation and training. The inventory consists of 15 TBM 700As used by the French air force; five 700As and eight TBM 700Bs deployed by the French army aviation; and four 700As assigned to the French flight test centre.

"These TBM 700s were among the first military aircraft for which the French armed forces outsourced a maintenance contract," says Daher. The initial contract was awarded to the Tarbes-based company in 2001, shortly after the creation...

## Boeing Bullish On Near-term Future for F/A-18, F-15 Upgrades

2015 - 06 - 15 -

[aviationweek.com](http://aviationweek.com)

With a little help from the U.S. Congress and the potential for international orders, Boeing is bullish about prospects for its international fighters. A year ago, the fate of the F/A-18 production line in St. Louis was uncertain. Pentagon orders were trailing off, and the Navy again did not formally request money for the platform for fiscal 2016.

The Navy, did, however, ask lawmakers informally, calling the F/A-18 an unfunded priority, and all four of the U.S. Congress's defense committees have recommended purchasing as much as 12 additional Super Hornets. One committee is seeking additional EA-18G Growlers to make up for electronic warfare programs that the Navy had requested one year ago.

"That gives us some confidence there will be another tranche," says Chris Raymond, vice president of business strategy for Boeing Defense, Space & Security, adding with international orders, the...
